information and activity**

FLOW

Discover → Plan → Experience → Share

HOW TRAVEL SPHERE WORKS

01

Login / Signup

02

Explore Destinations
& Posts

03

Select / Plan a Trip

04

Manage Trip Details

05

Travel & Experience

06

Share Experience

07

Interact with the Travel Community

Frontend → Backend → Database

Frontend

Frontend handles user interaction and UI.

Backend

Backend processes requests and application logic.

Database

Database stores users, trips, posts, and related data.

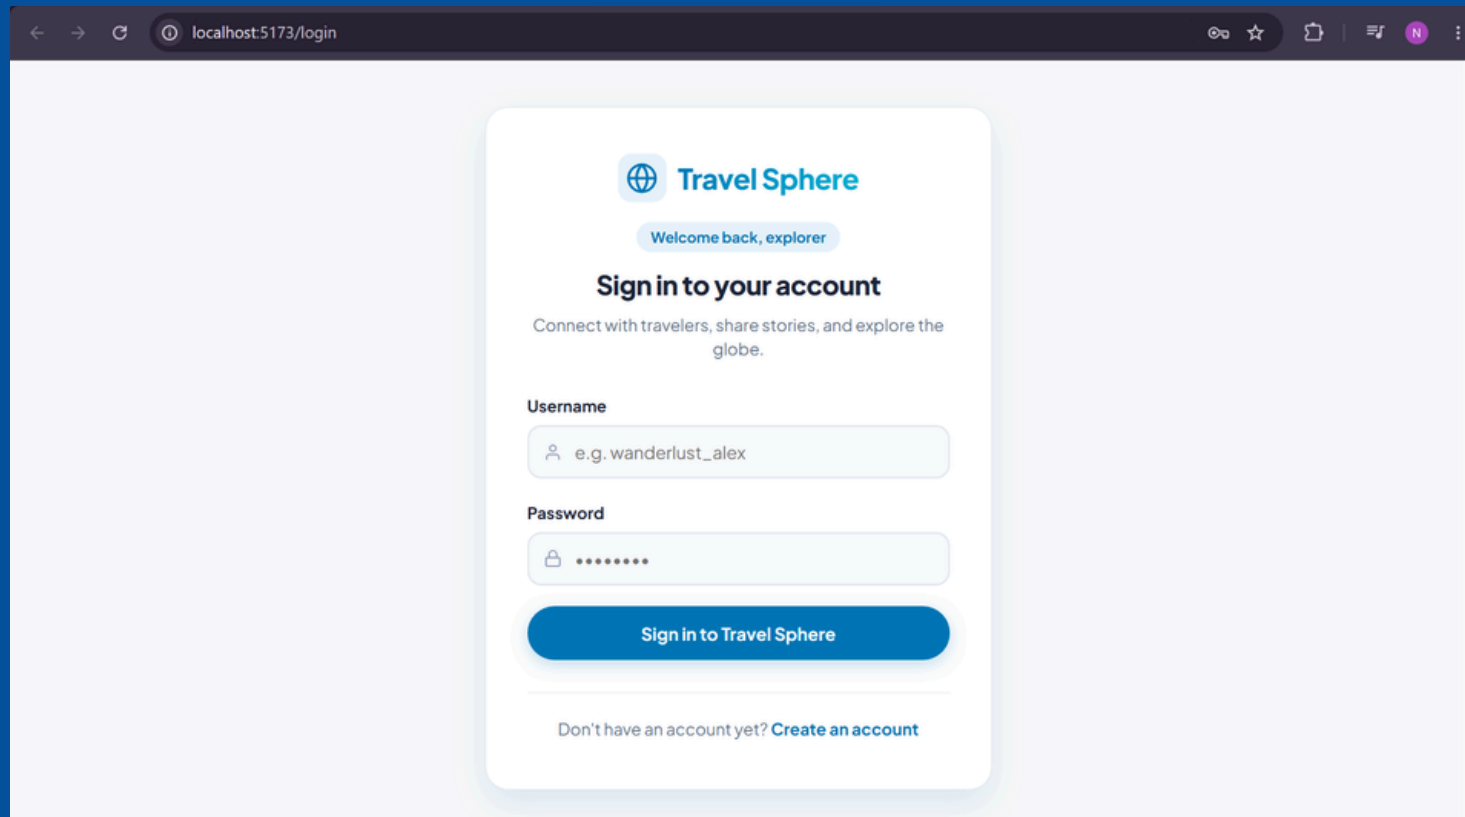

Current Prototype

- Functional UI for major screens
- Frontend-backend communication
- User and travel content management
- Core navigation and interaction flows

Next Steps

- Complete remaining backend functionality
- Improve personalization/recommendations
- Testing and bug fixing
- UI/UX refinement
- Final integration and deployment

Building a complete end-to-end travel experience with Travel Sphere.

The screenshot shows a web browser window with the address bar displaying 'localhost:5173/login'. The page content is a login form for 'Travel Sphere'. At the top, there is a logo with a globe icon and the text 'Travel Sphere'. Below the logo is a welcome message 'Welcome back, explorer' in a light blue pill-shaped button. The main heading is 'Sign in to your account', followed by a subtext 'Connect with travelers, share stories, and explore the globe.' The form contains two input fields: 'Username' with a placeholder 'e.g. wanderlust_alex' and a person icon, and 'Password' with a placeholder of seven dots and a lock icon. A blue button labeled 'Sign in to Travel Sphere' is positioned below the password field. At the bottom, there is a link that says 'Don't have an account yet? [Create an account](#)'.
